MISSION

Creating value through innovative development of ideas, supporting our partners with professionalism, flexibility and effectiveness.

VISION

Reaching market leadership as a reliable and precise supplier. Planning the future without losing sight of our history and the values that allow our growth.

WE CREATE SOLUTIONS

In the new headquarters **Movex** designs and manufactures high quality components for the food, beverage, packaging, automotive and automation industries.

Movex meets your needs for standard and custom products in a dynamic and responsive way ensuring the best performance product with an attractive market price.

RESEARCH & DEVELOPMENT

The rich experience that **Movex** has acquired over the years shows that care and innovation of products are essential to guarantee constant quality.

Thanks to the investments as well as developing strategic departments **Movex** has created new space where research and innovation become concrete tools to satisfy customers' requirements.

WE SUPPORT YOU

A top service level is the goal of a qualified Engineering and Sales team with the objective of presenting **Movex** as a supplier of excellence to all clients.

Through a distribution/network which spans the globe, **Movex** offers technical support and a careful after-sales service, always at your disposal.

Movex RS PRO

SUPER RS MAGNETIC CURVE

New

Patented

A new concept of Magnetic curve.

Movex® introduces a new concept of magnetic magnetic curves to offer improved conveyor performance.

RS PRO is a patented system that consists of machined, plastic curve tracks equipped with permanent magnets with a new curve-return concept. This concept with a special return section-plate provides a total support of the chain or belt in the return of the curve.

RS PRO is equipped with wear-strips in **BluLub**, which contributes to improved PV-properties compared to standard UHMW-PE curves especially in applications with limited lubrication, higher speeds and/or higher loads.

RS PRO curves equipped with **BluLub** wear-parts create the possibility to reduce the energy consumption due the lower friction which also improves the product stability and wear-life of chains and belts.

Wear strip *made in BluLub*

The new assembly system reduces the maintenance-time in case of replacement. **BluLub** material guarantees great performance especially in applications with limited use of lubricants, higher speeds and/or higher loads.

Return section

The return section of the **RS PRO** curve (made out of **UHMW-PE**) is designed to reduce the distance between chain and magnets; ensuring steady magnetic force and keeping the chain in the correct position.

New support plate *made in BluLub*

The new return-section plate made out of **BluLub**, creates a full support of the chain or belt in this return-section.

RS PRO patented curves can be used for both, chains as well as chain-belts. Depending on the installation of the return-section plate, the correct space is created in the return.

Basically, two executions in one design! *More info in the next page.*

Suitable for Chain-belts & Plastic chains:

RS PRO

Advantages:

- Lower Wear
- Lower Friction
- Easy to install
- Easy to maintain
- Longer wearlife of chain
- Lower Maintenance cost

880 M

Standard CURVE

RS PRO CURVE
with **BluLub** WEARSTRIPS

Wear test

RS PRO patented system provides the largest contact surface area between chain and curve, this improves the product stability specific after many hours of operation. Due the large contact area, the wear is optimum and equally divided with a minimum of force in the return-section.

Movex® RS PRO means longer wearlife of chain and curve, lower maintenance cost and better performance!
